

# MODULE-6

● What are events in Google analytics? ANS: In Google Analytics, events are user interactions tracked on a website or app beyond simple page views. They capture actions like clicks, form submissions, video plays, downloads, or scrolling. Each event has a name (what happened) and parameters (extra details). In GA4, events are the core of data tracking and include automatically collected, enhanced measurement, recommended, and custom events. They help businesses understand user behavior, measure engagement, and track conversions. In short, events show what users actually do on your site, not just which pages they visit, enabling better decisions and optimization. ● Connect your created website and blog to search console, analytics, and google tag manager and add your faculty as a user with required permission in it.

ANS: Step A — Google Search Console

### Users and permissions

Step C — Google Tag Manager (GTM)

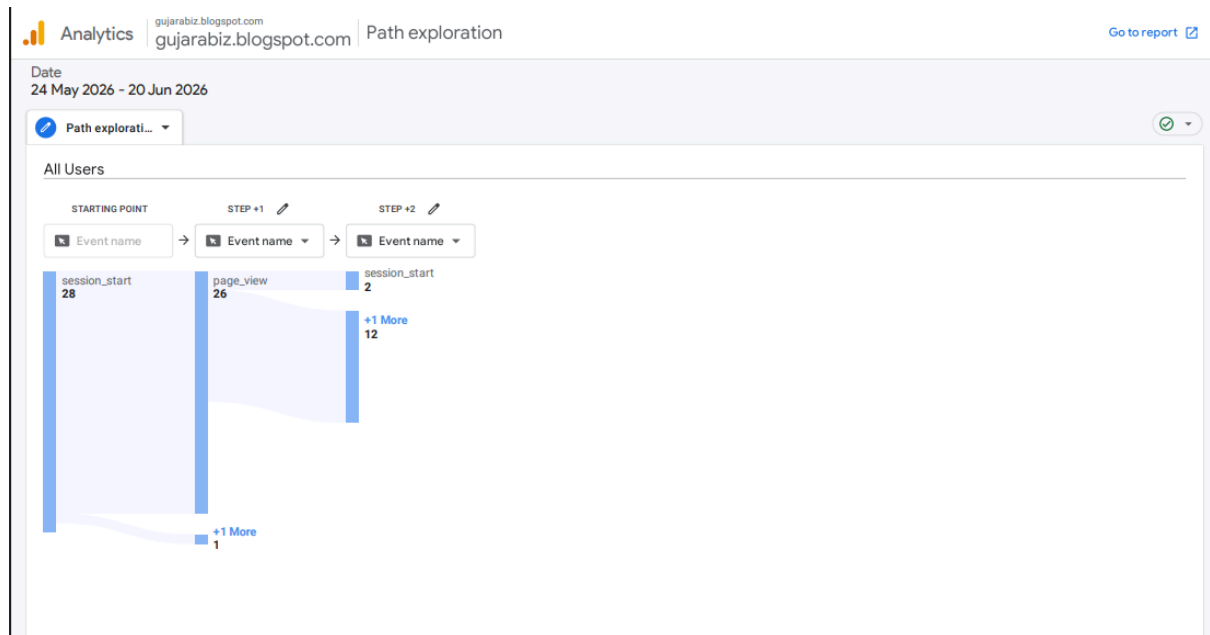

- Submit the sitemap and robot.txt file in the search console for your website. ANS: Submitting Sitemap

## robot.txt file

- Submit the user flow and traffic source reports for your website.

- Connect your blog to Google Analytics and study the different types of traffic on your site.

| Data streams                                                                             |     |             |                                     |
|------------------------------------------------------------------------------------------|-----|-------------|-------------------------------------|
| All                                                                                      | iOS | Android     | Web                                 |
| <div><div></div><div>gujarabiz.blogspot.com</div><div>gujarabiz.blogspot.com</div></div> |     |             |                                     |
|                                                                                          |     | 14595222296 | Receiving traffic in past 48 hours. |

Types of Traffic in Google Analytics:

| Traffic Type   | Source                                | How to View                       |
|----------------|---------------------------------------|-----------------------------------|
| Organic Search | Google, Bing, Yahoo (unpaid)          | Acquisition → Traffic Acquisition |
| Direct         | User typed URL directly or bookmarked | Acquisition → Traffic Acquisition |
| Referral       | Links from other websites             | Acquisition → Traffic Acquisition |
| Social         | Facebook, Instagram, Twitter, etc.    | Acquisition → Traffic Acquisition |
| Email          | Email campaigns with UTM tags         | Acquisition → Traffic Acquisition |
| Paid Search    | Google Ads, Bing Ads                  | Acquisition → Traffic Acquisition |
| (Other)        | Unclassified or custom channels       | Acquisition → Traffic Acquisition |
