

Module – 4 Assignment

PPC (Pay Per Click) – Google Ads Assignment

1) What are the main factors that can affect PPC bidding?

PPC (Pay Per Click) bidding is affected by the following factors:

1. Keyword Competition

If more advertisers bid on the same keyword, the **CPC becomes higher.**

2. Quality Score

A higher Quality Score helps achieve better rankings at a lower cost.

3. Ad Relevance

The advertisement should match the user's search intent.

4. Landing Page Experience

A fast, mobile-friendly, and useful landing page improves ad performance.

5. Bid Amount

The maximum bid amount set by the advertiser affects ad ranking.

6. Device Type

CPC may vary for mobile, desktop, and tablet devices.

7. Location Targeting

CPC is generally higher in metro cities and competitive locations.

8. Time and Day

During peak hours, competition increases, which can increase CPC.

9. Audience Targeting

Targeting the right audience improves conversion rates.

10. Ad Extensions

Using call, location, and sitelink extensions improves CTR.

2) How does a search engine calculate Actual CPC?

Formula:

Actual CPC = Competitor's Ad Rank ÷ Your Quality Score + ₹0.01

Example:

- Competitor Ad Rank = 40
- Your Quality Score = 8

$$40 \div 8 + 0.01 = ₹5.01$$

Therefore, the Actual CPC will be ₹5.01.

3) What is a Quality Score and why is it important for Ads?

What is Quality Score?

Quality Score is Google Ads' rating system that ranges from 1 to 10.

It is based on the following factors:

- Expected CTR
- Ad Relevance
- Landing Page Experience

Importance of Quality Score

1. Lower CPC

A high Quality Score helps reduce advertising costs.

2. Better Ad Position

Google gives higher rankings to quality advertisements.

3. Higher ROI

Advertisers receive more conversions at lower costs.

4. Improved User Experience

Relevant advertisements provide better value to users.

4. Create an ad for your website/ blog in Google Ads that display on the display network with the properly targeted audience
