- Google Chrome
- Mozilla Firefox
- Microsoft Edge
- Safari
- Opera
- Brave
- Vivaldi
- UC Browser
- Samsung Internet
- Tor Browser

(3) HTTPS / SSL Update

● HTTPS stands for **HyperText Transfer Protocol Secure**.

● It is a secure version of HTTP that protects data transferred between the user and the website.

● SSL (Secure Sockets Layer) is a security technology that encrypts the data, making it safe from hackers.

● After the HTTPS/SSL update:

- Websites become more secure 
- User data (like passwords, card details) is protected
- It builds trust among users
- Helps improve Google ranking (SEO benefit)
